***Response to Amendment***

1. The amendment filed on 1/5/05 has been entered. Claims 9, 16 and 19 are canceled and claims 1-8, 10-15, 17, 18 and 20 are now pending.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-8, 10-15, 17, 18 and 20 are rejected under 35 U.S.C. 102(e) as being by anticipated by Peyrelevade et al (US 2001/0120550 A1).

Peyrelevade et al teach a system including the steps of: at least one reseller's electronic site, each such site arranged to display information pertaining to products that are selectable by a user, said products provided to said reseller from a source independent (third party) from said reseller (page 9, [0102], lines 5-9); at least one database (fig. 3, 3600) controlled by said independent source (third party), said database (fig. 3, 3600) arranged to contain information specific to said source's modules that are displayable to said user via said reseller's electronic site (page 6, [0070], lines 1-3); and at least one communication link 2300 controlled jointly by said source and said reseller (fig. 2), the link used to electronically distribute the latest version of the data to said reseller, the timing of said distribution determined by said source (page 3, [0041], lines 1-19), accepting a purchase order for a user selected product under control of said source

Art Unit: 3627

location block [108-110]; controlling delivery of said product to said user by said source location; and concurrently while said order is being accepted by said source location maintaining a commercial relationship between said user and the reseller to which said user is then electronically connected (see fig. 3); a system wherein said source-controlled database can communicate to a plurality of electronic sites, each controlled by a different reseller (fig. 3), wherein further comprising means for causing the distribution of product data to a plurality of reseller's electronic sites, such that the product data will be uniformly displayed to an accessing user regardless of which one of said plurality of reseller's electronic sites said user accesses (page 11, [0127], lines 1-6), and wherein further comprising: at least one second communication link established from said source database to an accessing user at a reseller's electronic site such that said accessing user may receive certain data directly from said source database while said accessing user remains in communication with said reseller's electronic site, said second communication link independent from said first-mentioned communication link (page 5, [0061], lines 1-8). Peyrelevade et al teach establishing a transactional relationship between a user and said reseller (fig. 3, 2300); receiving from said user a specific request; and communicating said user's request to said source (third party, fig. 3); and said method further including the steps at said source of: receiving user requests from said resellers; and directly fulfilling each said request from said source to said user while still maintaining said established transactional relationship (fig. 3), wherein said maintained transitional relationship controls of payment between said user and reseller (page 9, [0110], lines 1-7).

***Response to Arguments***

4. Applicant's arguments filed 1/5/05 have been fully considered but they are not persuasive.

Applicant argues that the rejection does not show "electronic distribution of the latest version of data" as claimed but Peyrelevade et al discloses in box [0127] "creating and distributing (electronically) to the subject a computer program (latest data) configured to run on the subject's workstation or computer." Applicant further argues that Peyrelevade et al do not disclose "allowing a user to directly access an electronic version of a product from the source of the product." The source in this particular case is considered to be the third party disclosed by Peyrelevade et al. which allows a transaction between a user and a reseller wherein a source (third party) separate from the reseller delivers the product. Peyrelevade et al does disclose completing a transaction by allowing a user to purchase a product. Applicant's arguments have been found unpersuasive, the Examiner maintains that the Final action was proper as detailed in previous Office action.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3627

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
